

## HYDRO FIX

### Der smarte Designboden

Hydro Fix ist der wasserfeste, äußerst resistente Designboden mit integrierten Trittschall.

Seine geringe Aufbauhöhe und sein modernes Holz- und Stein-design überzeugt in ganzer Linie. Weiters kann Hydro Fix durch seine naturnahe Haptik und durch die strukturierte Oberfläche punkten.

Die Wasserfestigkeit, die sehr hohe Massstabilität unter Temperatureinwirkung und die hohe Belastbarkeit machen den Designboden für alle Bereiche interessant. Besonders hervorzuheben ist der integrierte Trittschall und die elastische Zwischenlage. Diese unterstreichen einen angenehmen Gehkomfort und unterscheidet Hydro Fix maßgeblich von anderen Produkten.

### The smart design floor

Hydro Fix is the waterproof, highly resistant design floor with integrated impact sound.

Its modern wood and stone design and low construction thickness are convincing throughout. Furthermore, Hydro Fix can score with natural touch and structured surface.

The water resistance, the very high dimensional stability under temperature change and the high durability make the design floor interesting for all areas. Particularly noteworthy is the integrated impact sound and the elastic intermediate layer. These underline a pleasant walking comfort and distinguish Hydro Fix significantly from other products.
